

# IT Security

an AccountingWEB event

Wednesday 17 October  
8.45am – 11.00am  
The Law Society, London

You can book your place to this and other  
AccountingWEB events online:

■ [Online booking form](#)

## Event overview

### **Presentation 1 - What you need to know about IT security**

AccountingWEB's security adviser Stewart Twynham will cover IT security from the ground up, covering the basic principles of confidentiality, integrity and availability as well as some of the latest threats and remedies. Topics will include:

- The latest threats -email worms, phishing, website hacks, operating system and wireless vulnerabilities
- What are the issues that matter to your firm? Determining appropriate response levels & costs
- Patch management
- Business continuity planning to protect your information assets

### **Presentation 2 - Case study - ISO27001 and information security at a leading bank**

High profile failures to safeguard data, resulting in disclosure of identities, banking records and so on have put businesses of all sizes under greater security. These underlying issues were a concern for a major bank, which following a review of information security decided to adopt ISO27001. Our speaker explains how they went about it.

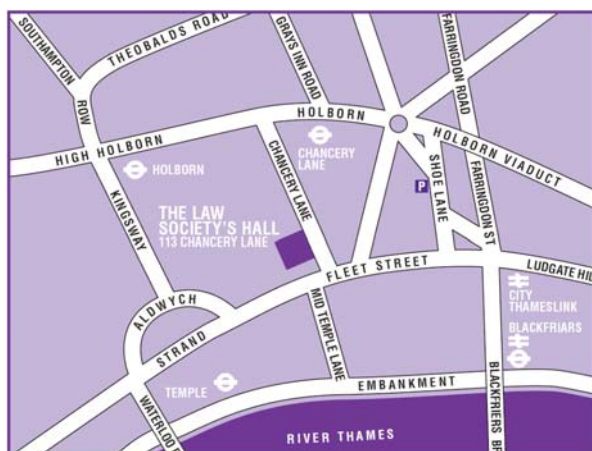

## About AccountingWEB

Launched in 1997, AccountingWEB.co.uk is the no.1 destination for accountants and finance professionals.

In addition to regular e-newsletters, authoritative contributors provide specialist email publications on subjects including IT, tax and financial reporting.
